WHITE-FLOWERING DOGWOOD

PINK-FLOWERING DOGWOOD

## *Introduction* ~

N 1848, just 108 years ago this spring, Stephen Hoyt, great grandfather of our present president, started in the nursery business on the very site where our Nursery stands today.

In the early years only a few acres of trees were grown; propagation consisted almost entirely of fruit trees, since there was little demand for ornamental plants at that time. Later on through the years, flowering shrubs, evergreens, and an almost complete line of nursery stock were added, until we now grow nearly all varieties of trees and shrubs which thrive best in this locality.

We sincerely thank our many thousands of friends for their liberal and ever-increasing patronage that has enabled this Nursery to grow until we now have several hundred acres under cultivation, covered with thousands of plants.

During the past hundred years, we have always attempted to grow only the best nursery stock. In the future we aim to offer still finer plants and better service.

# NOTICE TO CUSTOMERS

◀ This catalog lists our trees and shrubs, but to appreciate them fully you should see them. Come over to the nursery and look around.

◀ OUR MATERIALS and service are available to you directly or through your Landscape Architect.

◀ PLANTING begins in the spring as soon as frost is out of the ground and extends through April, May and June. Fall planting begins in August and extends through December, or until the ground freezes. When the season is far advanced, we reserve the right to ball and burlap (B&B) at extra charge, those items not so listed, to insure success in transplanting.

---

## BUSINESS HOURS

SPRING SEASON (April and May) and FALL SEASON (October and November) the Nursery will be open from 7:30 A.M. to 5:00 P.M. weekdays. Sundays from 9:00 A.M. until 12:00 noon and from 1:30 P.M. to 4:00 P.M.

During SUMMER AND WINTER MONTHS we are open from 7:30 A.M. to 5:00 P.M. *Sundays* by appointment only. No stock dug Sundays.

---

◀ PRICES—in this list do not include cost of delivering and planting. Plants are priced for our selection only. Specimen plants, many of which are not included in this list, will be charged for according to their individual value when selected by you. All quotations offered are subject to prior sale. These prices supersede all others and are subject to change without notice.

◀ DELIVERIES — pro rated charge on scheduled trips. Special deliveries conflicting with normal schedule will be arranged and charged for at cost.

◀ TERMS—Cash or satisfactory references must accompany all orders.

## GUARANTEE

We guarantee to replace, at one-half original purchase price, any plant or tree that we have supplied, which dies from natural causes within a period of one year (except those items marked with a star), provided the plants have been properly cared for, and provided payment has been received in 30 days or as arranged. The cost of delivering and planting of replaced material is borne by the purchaser and replacement is made at our convenience.

*Acer saccharum* (Sugar Maple)

## *Ornamental and Shade Trees*

Possibly the most attractive feature of many of our New England towns is their large shade and ornamental trees.

**SHADE TREES** transplant best during the Fall and Winter seasons. Therefore our policy for planting Shade Trees is **WE WILL PLANT ONLY FROM NOVEMBER until MARCH 31st.**

It is important to plant some of these trees each year, since it takes from ten to twenty-five years to produce a good-sized specimen. Plant medium-sized trees and they will grow rapidly into lofty specimens.

For over half a century, our Nursery has been moving medium and large sized shade trees successfully. We have growing in our Nursery many varieties that do well in this locality.

Trees not marked B&B (Balled and Burlapped) can be moved with bare roots when taken in the fall or winter when the trees are dormant.

2 to 2½-in. cal., 10 to 12 ft. high, bare root. . . . . 17 50

# Flowering Trees

There is probably no group of deciduous plants as popular or well known as this one. Their interesting habits of growth, glossy foliage, and gorgeous spring blooms, followed by attractive fruit of many colors in late summer and fall, make them an all-year-round satisfaction. Trees in this group thrive in almost all kinds of soil, and most varieties are very hardy. They flower best in full or partial sunshine.

## CERCIS canadensis. *Redbud*; *Judas-Tree*.

Broad, irregular, vase-shaped tree that flowers from stem to tip before leaves appear. Flowers are rosy pink. A fine plant for wooded areas.

Each  
5 to 6 ft., B&B.....\$12 50

## CHIONANTHUS virginica. *White Fringe-Tree*.

Beautiful, fragrant, drooping clusters of misty white flowers showing through broad green leaves. Bears blue fruit in autumn.

*Chamaecyparis  
pisifera squarrosa*  
(Moss Cypress)

## Evergreens

Evergreens give permanent beauty all the year, carrying their beautiful richly colored foliage through the winter when deciduous trees and shrubs are leafless. Every home-builder, no matter how small the grounds, needs them. They not only provide privacy, but are indispensable for shelter and wind-breaks, hedges, backgrounds, and specimens in landscape work. The slow-growing and spreading varieties such as Yews and Junipers are available for use in house and garden plantings. Practically all evergreens require light and air. Yews and Hemlocks are the most tolerant of shade.

All Evergreens B&B (Balled & Burlapped)

### *Chamaecyparis* (Retinospora) • Cypress

A large family of evergreens thriving in various soil conditions. Their uses are numerous because they vary in both color and size. Some grow into tall trees, while others are dwarf. Use this evergreen as a background for gardens, hedges, house foundations, and in rockeries. It must be used in the sunlight for best results. Most varieties grow rather rapidly.

#### *CHAMAECYPARIS obtusa gracilis. Hinoki Cypress.*

Semi-dwarf with rich green color. Makes an ideal hedge.

	Each
15 to 18 in., B&B.....	\$5 00
18 to 24 in., B&B.....	7 50

## Evergreens

### Juniperus • Juniper; Cedar

The Junipers are a large group of evergreens growing in almost all parts of this country, as well as in many other parts of the world. These plants are used extensively in garden work, due to their varying types and interesting habits of growth, either columnar, bushy, or spreading. All varieties are extremely hardy and have attractive foliage, varying in color from light to dark and even to a bluish green. Some have showy blue berries in the fall. They may be used as individual specimens, for screens, hedges, or in rock gardens. They grow best in a well-drained soil in full sunshine, and for best results should be fed occasionally to maintain their color and artistic habits of growth.

#### **JUNIPERUS chinensis columnaris. Columnar Juniper.**

A rapid growing narrow cedar. Blue-green foliage. Should be trimmed annually. Each

3 to 4 ft., B&B.....\$7 50

#### **J. chinensis hetzi glauca. Hetz Blue Juniper.**

Quite spreading in habit. Striking intense blue foliage.

18 to 24 in..... 6 00

2 to 2½ ft..... 7 50

#### **J. chinensis pfitzeriana. Pfitzer Juniper.**

A hardy, spreading, irregular Juniper. Two-tone green foliage. Will stand city conditions well. One of our best evergreens.

1½ to 2 ft..... 4 50

2 to 2½ ft..... 6 00

#### **J. chinensis sargentii. Sargent Juniper.**

A very hardy, blue-green, trailing Juniper of compact growth. Good ground-cover; valuable for rockery.

12 to 15 in..... 5 00

# Evergreens

## **Juniperus virginiana cannarti. *Cannart Juniper.***

A very attractive hybrid having dark green, bunchy foliage. Bears porcelain-blue fruit in late summer. One of the best upright Junipers. Each

3 to 4 ft..... \$7 50

## **J. virginiana keteleeri. *Keteleer Cedar.***

A rugged, compact, pyramidal Cedar, bearing large, light blue berries in the fall. Has very attractive foliage, always free from disease.

3 to 4 ft..... 7 50

## Pinus • Pine

Most of these well-known evergreens grow rapidly into large, rugged trees. They have attractive foliage of various colors and are particularly well suited for windbreaks or screens, but they also grow into beautiful specimen trees. Some varieties thrive at the seashore, while others do best at higher elevations. All varieties, however, grow well under exposed or windy conditions and do best in full sunlight. Most Pines enjoy a light, well-drained soil.

## **PINUS montana mughus. *Mugho Pine.***

A very fine low-growing Pine, used successfully in border work. One of the best for shore plantings. Hardy. Each

12 to 15-in. spread.....\$5 00

## **P. strobus. *White Pine.***

A native Pine, probably the best known of all. Great favorite for planting with birch and hemlock; also a fine screen tree. Pruning makes it more dense. A five-needle Pine.

# Evergreens

*Pseudotsuga* (Douglas Fir)

## *Pseudotsuga* • Douglas Fir

This evergreen is a rapid, graceful grower. Its foliage varies from light to dark green, and in some types even to a bluish green. It is perfectly hardy and transplants easily. This conifer thrives in exposed locations and grows well in moist as well as well-drained soils. It is used for windbreaks, screens, or as a specimen tree; also used extensively for Christmas trees.

<i>PSEUDOTSUGA douglasi. Douglas Fir.</i>	Each
3 to 4 ft.....	\$10 00
4 to 5 ft.....	12 50

## *Taxus* • Yew

All varieties become handsome plants, some low or dwarf-growing, some faster and more upright, while others grow into large pyramidal-shaped trees.

They may be used in gardens, for hedges, near the house, or as individual specimens.

Yews are very hardy and some varieties are adorned with beautiful red berries in the late summer or fall. Some of these plants tolerate shade, but most grow best in full sunlight.

### *TAXUS baccata repandens. English Spreading Yew.*

A flat-growing, dark green Yew. Good for foundation, cemetery, rockery and border plantings.

# Evergreens

## Thuja • Arborvitæ

The Arborvitæ is among the well-known American evergreens. Most varieties are tall, fast growing, and are useful as hedges, windbreaks, backgrounds, and specimens in landscape work. The slower-growing and dwarf varieties are useful for foundation plantings and garden designs. The Arborvitæ is hardy and will thrive in all kinds of soil conditions. Most varieties need full sunlight for best results.

## Tsuga • Hemlock

Stately grace and dignity characterize the Hemlock, which we consider the most beautiful of the larger North American evergreens. Its attractive dark green foliage weeps gracefully and is tipped with the bright green of new growth during the spring. Hemlocks are hardy and thrive in almost any soil. They tolerate the shade better than other evergreens and are very adaptable, being used for hedges, backgrounds for gardens, or as specimens. They stand shearing or pruning or may be allowed to grow naturally.

# Azaleas

Happily situated by being planted in full sunshine but protected from winter winds, Azaleas produce brilliant blossoms of many colors. They want an acid soil, and during blooming time require an abundance of moisture. Some of our native types grow into fairly large bushes, but most Azaleas seldom attain a height of more than 3 or 4 feet.

# Hardy Evergreen Shrubs

The importance of this class of plant material has long been recognized by many garden lovers. Since most are evergreen, they present an attractive appearance in both summer and winter. They are comparatively slow growers, are easy to keep in bounds, and grow more beautiful with age. All of these varieties grow best in a somewhat acid soil, lightened by plenty of leaf-mold or peat moss, and some require protected locations for best results. Certain varieties may be used with success in plantings in the shade.

# Flowering Shrubs

Included among the Flowering Shrubs are those old favorites well known to all, as well as some worthy new varieties. We offer shrubs in two grades, a regular or standard grade and our specimen grade.

Our standard shrubs are sturdy, well-grown plants that will thrive and grow rapidly into fine bushes.

The specimen shrubs are larger, well-developed plants that have been spaced and pruned in the nursery, and when used in plantings, give an immediate landscape effect.
